DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of group I in Paper No. 3182004 is acknowledged.

Claim 2 is withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 3182004.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over JP 2001191139 (hereinafter referred to as JP'139).

JP'139 teaches a method of making a rocker arm as claimed including all of the steps as claimed, but does not discuss repeating steps until the correct shape is achieved. However, it is considered old and well known in the art to repeat metal deforming steps to get the correct shape ,thickness, etc, and official notice is taken of such. Further, it is considered that when JP'139 compresses the wall 30 that the length of the side walls inherently gets longer form the flow of material.
